Coding Ninjas I Remote

Teaching Assistance

- I have solved more than 1000 doubts, regarding Frontend and Backend.
- Debugged their code, and provided a new approach for the same problem.
- May/2023 Aug/2023

FeynnLabs | Remote | LOR

Machine Learning Intern

- Here I have worked on the Electric Vehicle Market Segmentation project
- In that project, I have engaged in data exploration, model development, and evaluation.
- Gained practical knowledge in Data preprocessing and feature selection.
- I Applied machine learning algorithms using Python and relevant libraries.
- 08/2021 09/2021

Exposys Data Labs I Remote

Machine Learning Intern

- Diabetes-Prediction-model by using Python
- Prepare the data-set using several methods to train the model.
- Build a model which can give high accuracy of predicting the disease.

Projects

Detection of Phishing Websites using an ML Approach - Python

Group Project | 3 members | Under Dr. Bappaditya Mondal, NITMAS, CSE Dept.

- The aim of the project is to detect phishing URLs.
- Here we can check which website is fraud and which is legitimate
- **Tech Used:-** Python and ML Algorithm like SVM, logistic Regrassion, Random Forest, Decision Tree. Compare ML algorithms based on accuracy, false positive rate, and false negative rate.

<u>Credit Card_fraud_detection</u> | <u>ML Project</u> - Python

Course Project || Under Dr. Debasis Giri, WBUT, IT Dept.

- My main moto is how to identify fraud transaction
- here the banks can check which credit card transaction is fraud and which one is legitimate.
- **Tech Used:** Anomaly detection, supervised learning algorithms like logistic regression or random forests, and resampling methods to address the class imbalance can be used to achieve this goal.

Electric Vechical Market Segmentation - Python

Group Project | 4 members | Under Feynn Labs.

- This is a team task where the job is to analyse the Electric Vehicle market in India using Segmentation analysis and come up with a feasible strategy to enter the market, targeting the segments most likely to use Electric vehicles.
- Tech Used:- EDA, Elbow method, Clustering algorithm (K-Mean Clustering Algorithm).

Diabetes-Prediction-Project - Python || Under Exposys Data Labs

- here Doctors can predict Diabetes with some random values, The input_data format = (Glucose level, Insulin, BMI, Diabetes PF, Age). Prediction value is '1' means diabetic '0' means not diabetic.
- Tech Used:- KNN, SVM, Naïve Bias algorithms.
- Modules/libraries- Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn

Achievements And Extracurriculars
